

승강기 안전제도 및 표준화 동향 국제세미나

International Seminar on Elevator Safety System and Standardization

한국승강기안전공단
KOREA ELEVATOR SAFETY AGENCY

PALA Pacific Asia Lift
And Escalator Association

PROGRAM

Session	Time	Topic	Presenter	Affiliation
Celebration	14:00	introduction of guests	Bongwon, Kang	KoELSA
	14:10 ~ 14:20	Congratulatory speech	Hyunmyung, Kang	KoELSA
			Graham Worthington	PALEA
	14:20 ~ 14:30	A commemorative photo shoot		
Seminar Program	14:35 ~ 14:50	Maintenance and Modernization of existing Lifts and Escalators	Noel Smith	AEA
	14:50 ~ 15:05	Global Codes and Standards, CEN/ISO activities for Harmonization of EN and ISO Codes	Graham Worthington	PALEA
	15:05 ~ 15:20	Survey of China Elevator-related Standards & Codes	Zhang Lexiang	CEA
	15:20 ~ 15:35	Regulations & Standards of Lifts in Vietnam and Initiatives	NGUYEN	VNEA
	15:35 ~ 15:55	break time		
	15:55 ~ 16:10	Digital Logbook and Modernization Hong Kong EMSD	Kaiser Cheng	EMSD
	16:10 ~ 16:25	Digital Twin Elevator and Smart Elevator Technology	Cho	Professor
	16:25 ~ 16:40	Funtional Safety Assessment	Heo	KTL
	16:40 ~ 16:55	Developing Standards for Elevator Remote Monitoring	Kim	MtoM
	16:55	Closing	Bongwon, Kang	KoELSA

Congratulatory Message

Hello.

This is Hyun-myung Kang, director of safety management at Korea Elevator Safety Agency.

I hope you understand that I'm on behalf of the chief director of KOELSA, because of previous schedule.

I'm very happy to hold an international seminar on the "safety system and standardization" in 2023 elevator safety week.

Thank you for coming to Korea to present the topic of today's seminar.

Graham, President of PALEA! Noel Smith, President of AEA!

Zhang Lexiang, Secretary of the CEA!

Lan Han, general secretary and Han director of the VNEA!

And thanks for all the elevator experts all over the world.

It has been a long time to hold an international face-to-face event named "2023 Elevator Safety Week" after COVID-19.

I expect it to be a very meaningful time.

The KOELSA hold this international seminar for sharing and accommodating of the elevators. First, we share the global elevator standard trends and the safety system of elevators in each country.

Second, we accommodate the domestic and foreign elevator safety strengthening and promotion of industry.

Recently, the new technologies such as IoT, robots and remote monitoring extends to the elevator industry all around the world, the necessity of preparing and improvement of regulations or development of international standards to support industries is gradually increasing.

Also, the elevator failure or accident problems due to social causes such as deterioration or increasing disasters are a key task in the global community.

Therefore, we need to strengthen exchanges on elevator safety with neighboring countries along with domestic efforts and actively dealing with the expected problems. In this sense, having an international seminar, which is holding under the theme of "Trend of Elevator Safety System and Standardization," is an appropriate time. Today's seminar is also a meeting of experts from all walks of life at home and abroad. I'm asking you to continued interest and support and through this opportunity, we both strengthen domestic elevator safety and international friendship.

Once again, thank you to the presenters, everyone who make an effort and participate for this event.

I hope you have a good time. Thank you.

2023. Nov. 8th
Hyun-myung Kang
